

PANAVISION

DVD COMBO

Panavision Australia is pleased to announce the *Panavision DVD Combo*.

The *Panavision DVD Combo* is a rugged, compact, monitor / recorder unit housed in a lightweight machined aluminium case. Purpose built for video assist recording on location or in the studio.

The unit is extremely easy to operate, yet it still has the feature set to compliment modern film making techniques. Whether from the control panel or from the infrared remote, the simple user interface means anyone can be trained to fully operate the *DVD Combo* in minutes.

The DVD-based recording mechanism allows instant one-button recording with stereo audio and instant one-button access to previous takes. Playback functions include high quality still frame, frame advance and six set speed emulations.

An internal video receiver and aerial mounting point, provide integration with UHF / VHF video transmitters. When cabled to a Panavision, Arri or Moviemcam camera, the recorder has the option to automatically record / stop upon camera roll / stop.

The recorder uses single or double sided DVD-R or DVD-RAM discs. These discs allow up to 6 hours (with 99 takes) recording per side, dependent on compression level. Four compression levels are selectable.

The *DVD Combo* can be powered from a 24 Volt block battery or from its external AC power supply. The 12" High Brightness LCD monitor maintains high quality with low power consumption. Additional monitors can be fed from the video output on the rear panel.

Specifications (PAL Version)

Size: 170 x 350 x 350 mm
Weight: 9 Kg
Power Required: 24 Volt DC
External Power Supply: 100 - 240 Volt AC (Auto Switching)
